Eesti Energia Audited Financial Results for 2014

27 February 2015
Disclaimer

This presentation and any materials distributed or made available in connection herewith (collectively, the “presentation”) have been prepared by Eesti Energia AS (the “Company”) solely for your use and benefit for information purposes only. By accessing, downloading, reading or otherwise making available to yourself any content of the presentation, in whole or in part, you hereby agree to be bound by the following limitations and accept the terms and conditions as set out below:

1. You are only authorized to view, print and retain a copy of the presentation solely for your own use. No information contained in the presentation may be copied, photocopied, duplicated, reproduced, passed on, redistributed, published, exhibited or the contents otherwise divulged, released or disseminated, directly or indirectly, in whole or in part, in any form by any means and for any purpose to any other person than your directors, officers, employees or those persons retained to advise you, who agree to be bound by the limitations set out herein.

2. The presentation does not constitute or form part of, and should not be construed as, an offer, solicitation or invitation to subscribe for, underwrite or otherwise acquire, any securities of the Company or any member of its group or should it or any part of it form the basis of, or be relied on in connection with, any contract to purchase or subscribe for any securities of the Company or any member of its group, nor shall it or any part of it form the basis of or be relied on in connection with any contract or commitment whatsoever. Any person considering the purchase of any securities of the Company must inform himself or herself independently before taking any investment decision. The presentation has been provided to you solely for your information and background and is subject to amendment. Further, the information in this presentation has been compiled based on information from a number of sources and reflects prevailing conditions as of its date, which are subject to change.

3. The information contained in this presentation has not been independently verified. The information in this presentation is subject to verification, completion and change without notice and the Company is not under any obligation to update or keep current the information contained herein. Accordingly, no representation or warranty, express or implied, is made or given by or on behalf of the Company or any of its respective members, directors, officers or employees or any other person as to the accuracy, completeness or fairness of the information or opinions contained in this presentation, and any reliance you place on such information or opinions will be at your sole risk. Neither the Company nor any of its respective members, directors, officers or employees nor any other person accepts any liability whatsoever for any loss howsoever arising from any use of this presentation or its contents or otherwise arising in connection therewith.

4. This presentation includes “forward-looking statements,” which include all statements other than statements of historical facts, including, without limitation, any statements preceded by, followed by or that include the words “targets,” “believes,” “expects,” “aims,” “intends,” “will,” “may,” “anticipates,” “would,” “plans,” “could” or similar expressions or the negative thereof. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors beyond the Company’s control that could cause the actual results, performance or achievements of the Company to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. Such forward-looking statements are based on numerous assumptions regarding the Company’s present and future business strategies and the environment in which the Company will operate in the future. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. Accordingly, any reliance you place on such forward-looking statements will be at your sole risk. These forward-looking statements speak only as at the date as of which they are made, and neither the Company or any of its respective agents, employees or advisors intends or has any duty or obligation to supplement, amend, update or revise any of the forward-looking statements contained herein to reflect any change in the Company. Past performance of the Company cannot be relied on as a guide to future performance. No statement in this presentation is intended to be a profit forecast.

5. This presentation is not directed to, or intended for distribution to or use by, any person or entity that is a citizen or resident or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would require any registration or licensing within such jurisdiction.
EBITDA Remained Stable Despite Lower Sales Revenues

NPS Price Convergence Higher as Transmission Capacity Increased

- NPS electricity prices decreased in the Nordic countries and Estonia
- Nordic electricity prices impacted by cheap hydroelectricity
- Transmission capacity between Estonia and Finland increased substantially in 2014 as Estlink2 power cable was commissioned in Q1
- Average price in NPS Estonia price area 37.6 €/MWh (-5.4 €/MWh, -12.5%)
- Price spread between Estonia and Finland decreased to 1.6 €/MWh (-0.2 €/MWh). Average Estonian electricity price still higher mainly due to outages in Estlink underwater cables in Q3
- Clean Dark Spread in NPS Estonia electricity price decreased to 13.5 €/MWh (-8.6 €/MWh, -39.0%) due to higher CO₂ and oil shale costs (impact -3.3 €/MWh) and decreased electricity price (-5.4 €/MWh)
  - CO₂ emission allowance prices rising as EU back-loading cut supply by 400 million tonnes in 2014 and new allocation measures are planned in future

Quarterly Average NPS Electricity Prices and Spreads

* Clean Dark Spread - full mining costs included
Estonia-Latvia Electricity Price Spread Widened

- Average NPS Latvia electricity price increased by 1.3 €/MWh (+2.7%) to 50.1 €/MWh. Estonia-Latvia price spread widened by 6.7 €/MWh to -12.5 €/MWh as Latvian price remained higher.
- Transmission capacities are unable to cover production deficit in Latvia and Lithuania.
- Limited month ahead hedging of border crossing costs available via PTR* contracts in 2014
  - Improved hedging conditions in 2015 introduce increased PTR capacities** and hedging via contracts traded in Nasdaq Commodities.
- Sale of electricity products indexed to exchange prices continued in 2014.
- Total amount of future fixed price contracts in Latvia and Lithuania 813 GWh (as of 31 December 2014), -1,509 GWh compared to the end of 2013
  - 64% of the portfolio concerning 2015 has been hedged by PTR contracts.

* PTR – Physical Transmission Rights. Price differences between Estonia and Latvia price areas are returned to market participants by TSO-s
** Traded capacities increased to 200 MW for a yearly, 100 MW quarterly and 150 MW monthly contracts.
Substantial Oil Price Decrease in 2014

- Average price of Brent crude oil 74.5 €/bbl (-8.0 €/bbl, -9.7%)
  - Oil prices started dropping in July 2014 as crude oil demand slowed down due to weakened world economic outlook
- Average price of fuel oil (1% sulphur content) 414.5 €/t (-42.1 €/t, -9.2%). Fuel oil vs Brent crack spread widened slightly by 0.2 €/bbl to -9.1 €/bbl, compared to 2013
  - Fuel oil demand in Europe remained subdued, but improved export prospects supported the price in Q1. Fuel oil prices decreased along with other fuels in the second half of the year
- Tighter fuel oil sulphur control limits in SOx emission control areas (ECAs)* in 2015 weigh on 1% fuel oil prices

* ECA – Emission Control Area. Marine area in which airborne emissions from ships are being minimized in order to reduce environmental impact
Revenues and EBITDA Mainly Impacted by Lower Electricity Sales Volume

**Sales Revenues Breakdown and Y-o-Y Change**

- **Electricity**: 966 m€ in 2013, 880 m€ in 2014, -8.9%
- **Distribution**: 92 m€ in 2013, 85 m€ in 2014, +8.6%
- **Shale oil**: 243 m€ in 2013, 241 m€ in 2014, +6.0%
- **Other**: 534 m€ in 2013, 451 m€ in 2014, +9.5%
- **Sales revenues 2013**: 310 m€
- **Sales revenues 2014**: 312 m€

**EBITDA Breakdown and Y-o-Y Change**

- **Electricity**: 54 m€ in 2013, 62 m€ in 2014, +7.4%
- **Distribution**: 89 m€ in 2013, 97 m€ in 2014, +7.9%
- **Shale oil**: 145 m€ in 2013, 120 m€ in 2014, +20.0%
- **Other**: 150 m€ in 2013, 140 m€ in 2014, +7.1%
- **EBITDA 2013**: 310 m€
- **EBITDA 2014**: 312 m€
Electricity
Lower Sales Volume Reduced
Electricity Sales Revenue

- Average electricity sales price* increased to 47.9 €/MWh (+1.7 €/MWh, +3.7%)
  - Gain on derivatives impacted price by 5.2 €/MWh (€47.2m in abs. terms, +€36.7m, +348.5%)
  - Average electricity sales price* excl. gain on derivatives decreased to 42.8 €/MWh (-2.5 €/MWh, -5.6%)**
- Total electricity sales volume 19.6% lower as retail sales volume dropped by 15.3% and wholesale sales volume decreased by 26.8%. Changes in netting principles decreased wholesale sales by 0.9 TWh
- Generation limitations hampered wholesale sales as lower retail market share reduced retail sales volume
- 2015 sales hedged against price risk amounted to 7.2 TWh with an average price of 40.5 €/MWh. 2016 sales hedged against price risk amounted to 2.9 TWh with an average price of 38.1 €/MWh

* Average sales price excludes subsidies
** Estlink1 cable revenues impacted sales price by 0.5 €/MWh in 2013
26% Retail Market Share in the Baltics

- Eesti Energia retail market share in Estonia decreased by 11.6 percentage points compared to 2013
  - Estonian retail market share decreased mainly due to movements in corporate customer segment
- Market share in Latvia and Lithuania decreased by 2.0 and 1.9 percentage points respectively, due to suspending the sale of fixed contracts in September 2013
- Market share in Baltic states decreased by 5.2 percentage points compared to 2013

* change compared to 2013
Impact on margin -€48.2m. Lower NPS prices resulted in decreased wholesale price. Retail profitability improved, total impact of sales price decrease (-2.5 €/MWh) was -€24.0m. Variable costs increased 3.2 €/MWh mainly due to higher environmental tariffs and CO₂ expenses.

Volume of electricity sold decreased resulting in -€37.7m lower EBITDA

Change in electricity fixed costs impacted EBITDA by +€7.0m mainly due to fixed cost component in decreased inventories.

Gain on derivatives impact on EBITDA by +€36.7m.

Other changes (+€17.3m) mainly related to change in provision of Latvia and Lithuania energy sales portfolio (+€15.1m).

**Key Figures**

<tr>
<td>Electricity EBITDA (€/MWh)</td>
<td>13.2</td>
<td>12.8</td>
</tr>
</tbody>
</table>

* excluding impairment of generation assets in December 2012 and December 2013
Distribution sales volume remained stable at 6.3 TWh (+0.2%)
- Distribution sales revenue decreased slightly (-€2.5m, -1.0%)
  - Regulated return reduced in August 2013 to 6.76%, additional tariff adjustment in April 2014 due to decrease in transmission costs
Average distribution sales price decreased by 0.5 €/MWh, impact on EBITDA -€2.3m. Decrease of sales price was offset by lower transmission costs (+€2.9m) and decreased expenses for network losses (+€3.1m). Total margin impact +€4.7m (+0.8 €/MWh)

Distribution volume increased 0.2%, impact on EBITDA +€0.3m

Fixed expenses decreased (+€3.5m) mainly in Group’s central divisions (-€2.6m). Fixed expenses related to outages caused by storms decreased as unplanned outages fell in 2014

Shale Oil
Shale Oil Sales Volume Increased

- Average shale oil sales price* decreased to 397 €/t (-45.7 €/t, -10.3%)
  - Gain on derivatives impacted price by 46.7 €/t (€10.8m in abs. terms, +€9.1m, +534.3%)
  - Average sales price* excl. gain on derivatives decreased to 350.6 €/t (-84.3 €/t, -19.4%)
- Average price dropped more than reference price (-9.2%) due to more sales in the second half of the year
- Sales volume increased 10.8% mainly due to higher production from Enefit280 oil plant. Groups’ shale oil production increased by 51.6 thousand tonnes (+24.2%)
- 2015 sales hedged against price risk amounted to 207 thousand tonnes with an average price of 419 €/t
- 2016 sales hedged against price risk amounted to 11 thousand tonnes** with an average price of 353 €/t

* average sales price excludes impact on sales revenues in 2014 (-€6.3m) related to receivable concerning Enefit280 oil plant construction. Sales revenue impact does not affect shale oil EBITDA due to capitalizing of corresponding costs
** in addition, the Group owns options in the amount of 120 thousand tonnes maturing in 2016
Hedging and Higher Sales Volume Mainly Behind Increased EBITDA

- Margin impact on profitability -€20.0m. Average sales price decreased by 84.3 €/t, impact on profitability -€19.4m. Higher variable costs impacted profitability by -€0.3m
- Sales volume increased (10.8%), impact on EBITDA +€8.0m
- Change in shale oil fixed costs (impact +€1.4m) mainly due to fixed cost component in inventories
- Gain on derivatives impacted EBITDA by +€9.1m
- Other impacts +€10.1m. Revaluation of derivative instruments maturing in future impacted EBITDA by €10.2m

Other Sales Revenues and EBITDA Improved

- Heat sales revenue increased 5.6% (+€2.3m), EBITDA grew 103.7% (+€5.8m). Sales volume increased 4.1%. EBITDA growth in heat sales mainly due to production shifting to cheaper fuels – waste instead of natural gas.
- Oil shale sales revenue increased 15.1% (+€3.8m), EBITDA increased 42.0% (+€3.6m). Sales volume decreased 5.9%.
- Technology Industries’ products sales revenue increased 11.6% (+€1.2m), EBITDA increased by €2.3m.
- Other sales revenues dropped 6.2% (-€1.3m). Revenue from sale of gas increased by €2.5m. Sales revenues related to sale of scrap metal shrunk by €1.9m. Other EBITDA decreased by €2.1m.
€228m Cash Flow from Operations

Capital Expenditure €276m in 2014

**Capex Breakdown by Projects**

- **Electricity network**
- **300 MW Auvere power plant**
- **Maintenance and other**
- **Capitalised interest**
- **Enefit280**
- **Iru Waste-to-Energy unit**
- **International projects (€1.2m in 2014)**

**Main Ongoing Projects**

- **Auvere power plant**
- **DeNOx Equipment**
- **Construction of chimneys**
- **Electrostatic precipitators**

**Capex Breakdown by Products**

- **Other**
- **Shale oil**
- **Distribution**
- **Electricity**

- **Size of ongoing projects decreased. Capex related to Auvere power plant construction decreased 50.6% (-€85.9m). Iru WtE unit completed in 2013**

- **Investments in distribution network quality continued. 633 substations and 1,901 kilometers of cables renovated and built in 2014. Installation of smart meters for Estonian clients ongoing**

- **Auvere power plant will be completed in the end of 2015**
**Enefit280 Update**

- Enefit280 oil plant produced 45 thousand tonnes of shale oil in 2014.
- Power production from the by-products of oil was commissioned in Enefit280 in 2014. 25 MW of stable power production was reached.
- During planned maintenance operations in 2015 modifications will be implemented to increase oil production capacity and reach design capacity during 2015.
Liquidity Buffer Has Increased 20%

Group’s Liquidity Development in 2014

- €350m of liquid assets and unused loans available as of 31 December 2014 of which
  - €100m of liquid assets
  - €150m amount of liquidity contracts with SEB, Pohjola and Nordea
  - €100m loan agreement signed with European Investment Bank to finance distribution network investments (loan not yet drawn)
- Sufficient liquidity available for covering capex until the end of investment program, dividend payment and other needs

* excl. changes in deposits and other financial assets
Debt Maturity Profile

- Eesti Energia credit ratings at investment grade level
  - BBB+ (S&P), stable outlook
  - Baa2 (Moody’s), stable outlook
- Total debt €935m as of 31 December 2014
- Eurobond maturities in 2018 and 2020

Net Debt/EBITDA & Financial Leverage

Net Debt/EBITDA, times

Year 2023: 18
Year 2024: 18
Year 2025: 12
Year 2026: 12
Outlook for FY2015 Forecasts Lower EBITDA Despite Increased Revenues

- Sales revenues in 2015 expected to grow slightly, EBITDA is likely to decline as profitability of electricity and shale oil sales will probably decrease
  - Electricity sales volume expected to grow but lower sales prices impact sales revenue
  - Shale oil sales revenue is likely to increase due to larger production despite projected lower sales price
- Capex will increase due to higher maintenance investments mainly in Narva Power Plants
- Planned dividend payment of €95.0m and income tax of €23.8m in 2015

* slight growth/slight decline until 5%, growth/decline >5%
Summary

• 2014 sales revenues decreased 9% to 880 million euros
  • Electricity sales revenue decreased by 83 million euros mainly due to lower sales volume
  • Shale oil sales decreased by 7 million euros. Higher sales volume partially supported sales revenues as average sales price decreased

• 2014 EBITDA increased 0.6% to 312 million euros
  • Electricity EBITDA decreased by 25 million euros mainly due to lower sales volume
  • Shale oil EBITDA increased 9 million euros as sales volume growth and hedging contributed to EBITDA in a challenging price environment
  • Distribution EBITDA increased by 9 million euros due to lower variable and fixed costs

• Investments decreased 34% to 276 million euros
**Production and Sales in 2014**

**Distribution Network**
- 6,294 GWh of electricity distributed to clients

**Electricity**
- 6,012 GWh sold in retail market
- 3,125 GWh sold in wholesale market
- 9,137 GWh of electricity sold
- 297 GWh of renewable electricity produced, 140 GWh of electricity purchased
- 9,389 GWh of non-renewable electricity produced

**Shale oil**
- 231 thousand tonnes of oil sold to clients
- 265 thousand tonnes of shale oil produced
- 17 m tonnes used in electricity and shale oil production
- Oil shale mined 16 m tonnes

Oil sold in retail market: 6,012 GWh
Oil sold in wholesale market: 3,125 GWh
Total electricity sold: 9,137 GWh
Renewable electricity produced: 297 G Wh
Non-renewable electricity produced: 9,389 GWh
Oil mined: 16 m tonnes
Oil sold to clients: 231 thousand tonnes
Total oil produced: 265 thousand tonnes
Oil used in electricity and shale oil production: 17 m tonnes
Oil shale mined: 16 m tonnes
Commodity Markets*

Nord Pool Estonia Electricity Price

December CO₂ Emission Allowance

Brent Crude Oil

Fuel Oil 1% NWE

* futures prices as of 31 December 2014
Closed Positions as of 31 Dec. 2014

* in addition, the Group owns options in the amount of 120 thousand tonnes maturing in 2016
** including free CO₂ allowances related to power plant construction in Auvere

Glossary

• **1 MWh** – 1 megawatt hour. The unit of energy generated (or consumed) in one hour by a device operating at a constant power of 1 MW (megawatt).

1,000,000 MWh = 1,000 GWh = 1 TWh

• **Clean Dark Spread (CDS)** – Eesti Energia’s margin between the price of electricity (in NPS Estonia) and the sum of total oil shale costs and CO₂ costs (taking into account the price of CO₂ allowance futures maturing in December and the amount of CO₂ emitted in the generation of a MWh of electricity). Calculation methodology has been improved compared to annual report 2013, by taking into account total instead of variable oil shale costs

• **CO₂ emission allowance** – According to the European Union Emissions Trading System (ETS), one emission allowance gives the holder the right to emit one tonne of carbon dioxide (CO₂). The limit on the total number of emission allowances available gives them a monetary value

• **Financial leverage** – Net debt divided by the sum of net debt and equity

• **Net debt** – Debt obligations (amortised) less cash and cash equivalents (incl. bank deposits with maturities exceeding 3 months), units in money market funds and investments in fixed income bonds

• **Network losses** – The amount of electricity delivered to customers is somewhat smaller than the amount supplied from power plants to the network because during transfer a part of electricity in the power lines and transformers converts into heat. In smaller amount, network losses are caused by power theft and incorrect measuring. The network operator has to compensate energy losses and for this a corresponding amount of electricity has to be purchased every hour

• **NPS system price** – The price on the Nord Pool Spot power exchange that is calculated on the basis of all purchase and sale bids without taking into account transmission capacity limitations

• **Position hedged with forward transactions** – The average price and the corresponding amount of electricity and shale oil sold and emission allowances purchased in the future is previously fixed.

• **RAB** – Regulated Asset Base, which represents the value of assets used to provide regulated services

• **Return on Fixed Assets (ROFA)** – Operating profit (rolling 12 months) divided by average fixed assets excl. assets under construction (allocated to specific product)

• **SAIDI** – System Average Interruption Duration Index. The sum of all customer interruption durations in minutes divided by the total number of customers served

• **SAIFI** – System Average Interruption Frequency Index. The total number of customer interruptions divided by the total number of customers served

• **Variable profit** – Profit after deducting variable costs from sales revenues
